The primary author of this blog.

Must be the same as `author` in `_config.yml`.

Change `author1` to your shortname.

author1:
name: Varun Srinivasan
email: vnsriniv@gmail.com

Used at the bottom of each page and at the top of the `about` layout
Markdown enabled, can use multiple paragraphs (enabled by `|`)
#about: I am a postdoctoral research associate (Dept. of Civil and Environmental Engineering, Northeastern University) working on characterizing the microbial ecology of phosphorus (P) cycling in both natural and engineered environments. My research is motivated by the incredible diversity of metabolisms that microorganisms possess. I believe that understanding and characterizing this diversity is the key to solving several environmental issues faced by our society.
